Leveldesign Aufgaben

Levels (Playable Spaces) in der Game Engine bauen

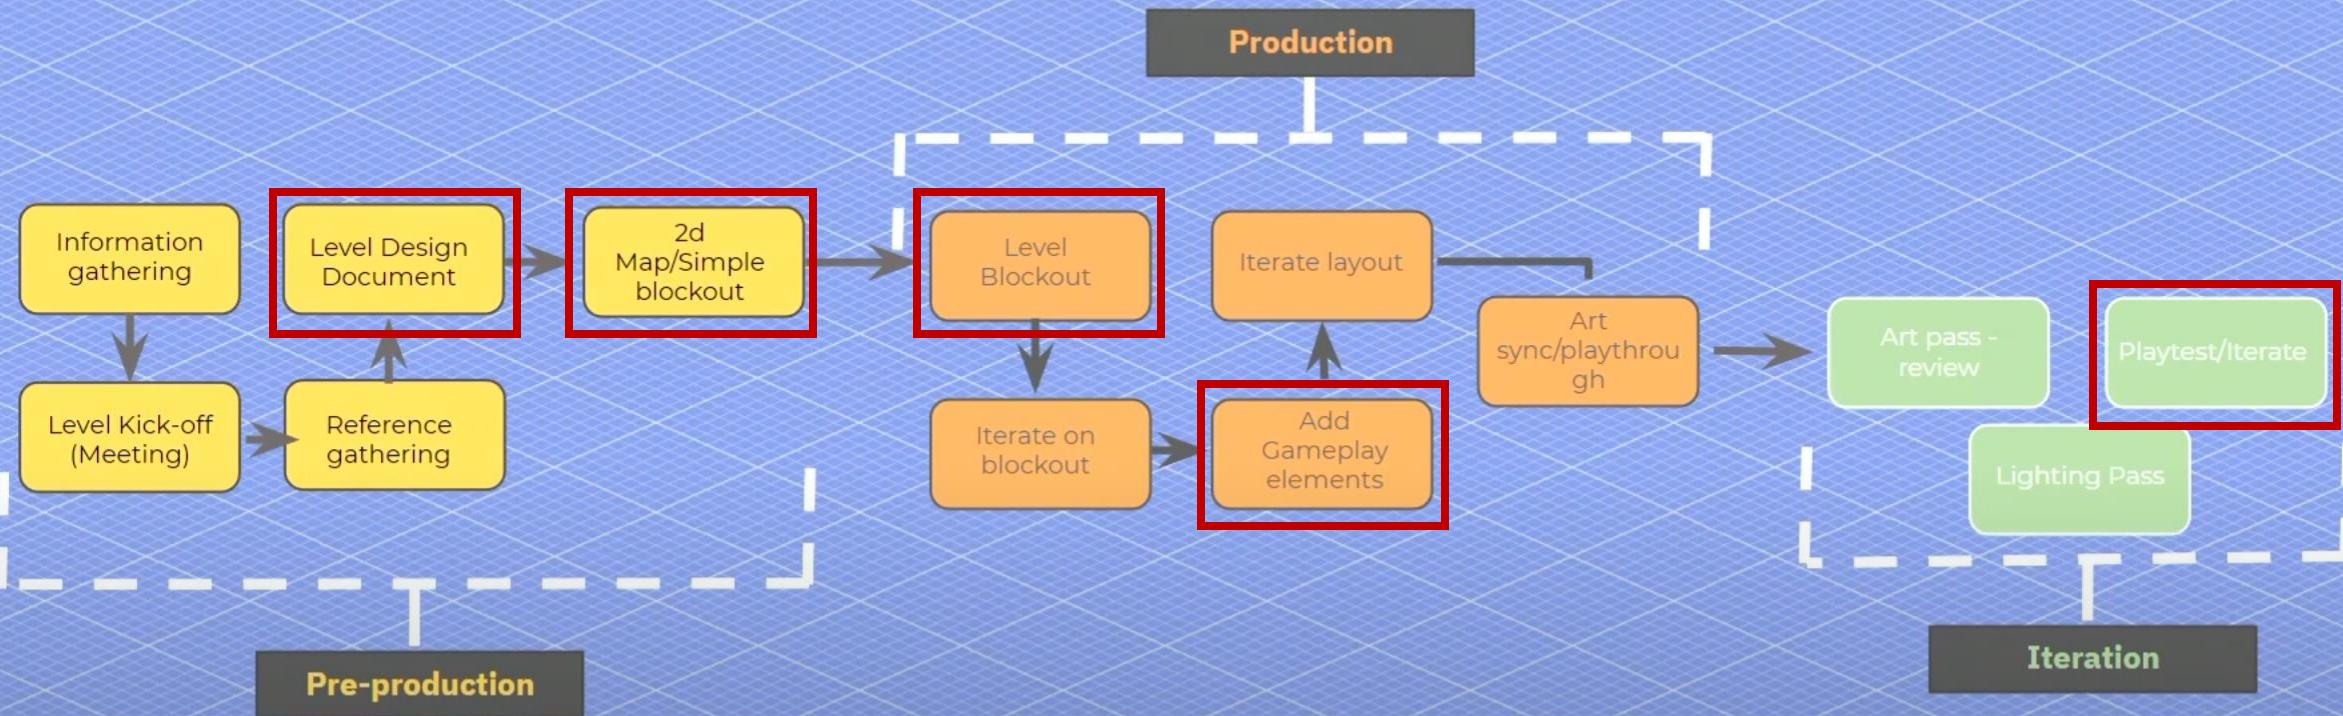

- Spielerführung
- Dramaturgie (Flow)
- Linear oder nichtlinear
- Gamedesign/Gameplay steht im Vordergrund
- Keine Art-Assets, aber Komposition (+Beleuchtung)

Level 1 - 3: Pipeline

Level 1 - 3: Pipeline

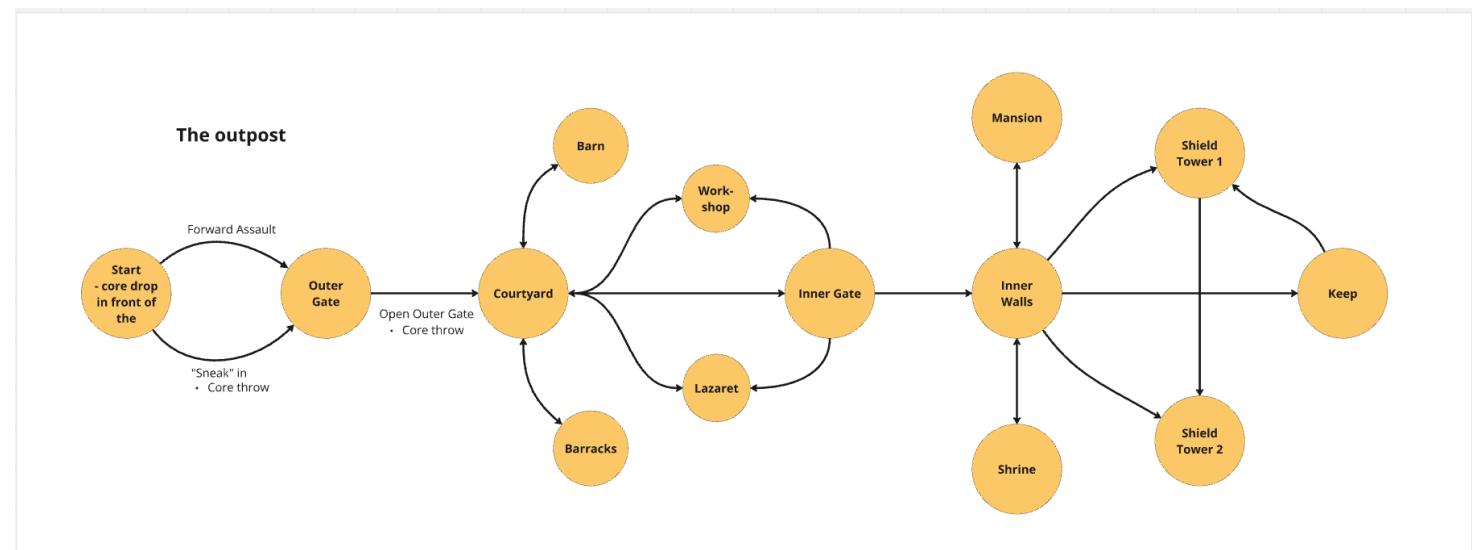

Text design

- Goals
- Elements
- Gameplay beats
- World building

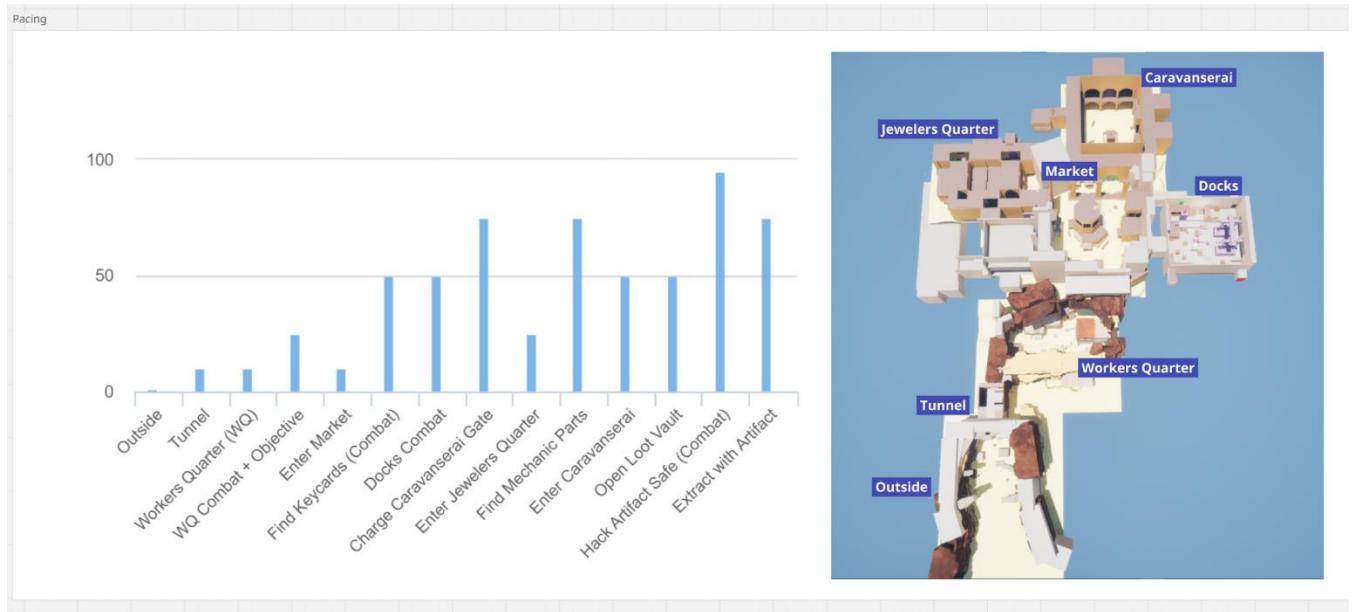

Diagrams

- Layout structure

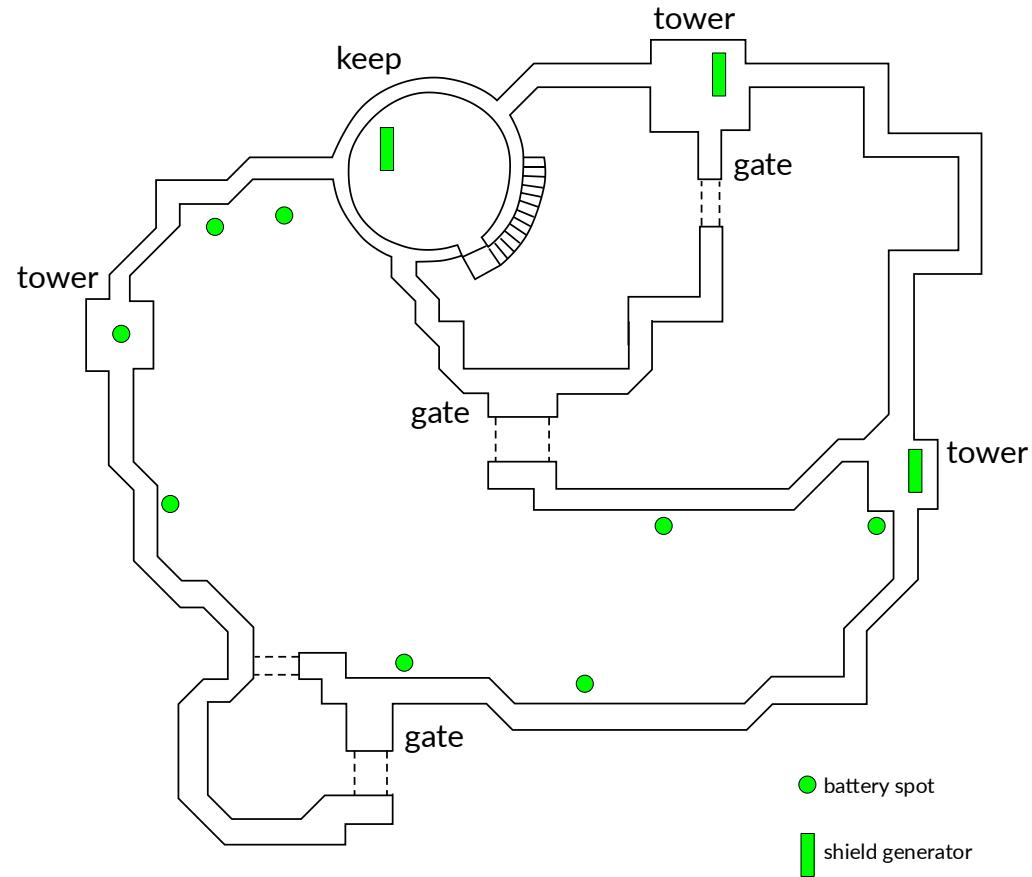

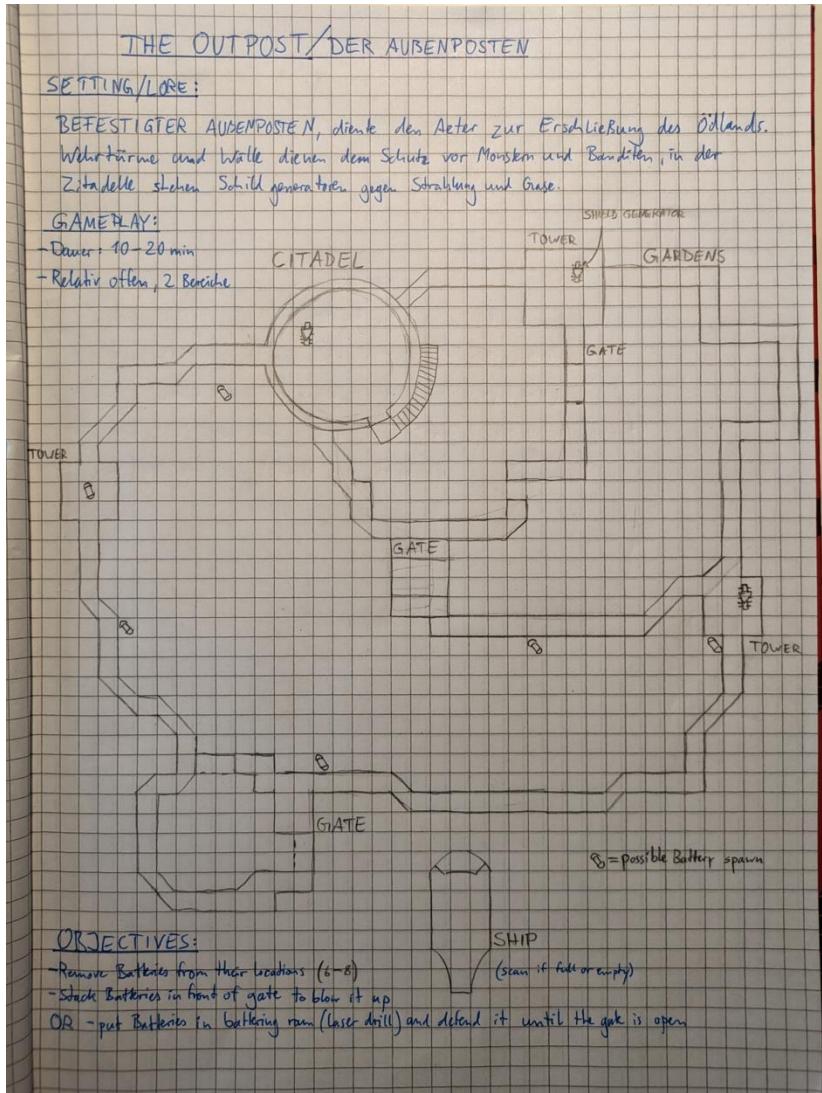

Diagrams

- Layout structure
- Pacing

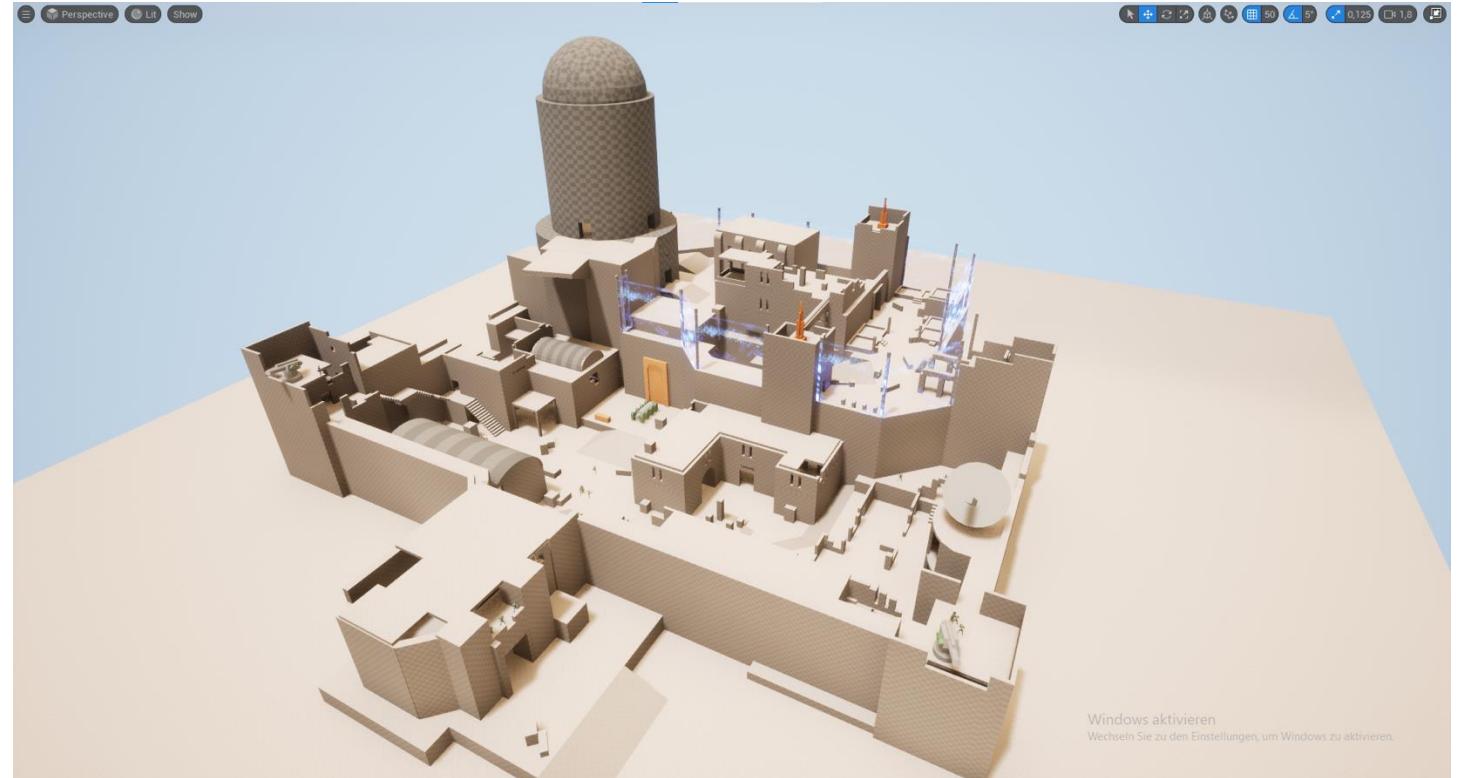

Paper Map

Blockout

- „Greyboxing“
 - In Engine
 - UE5 Plugin -> Blockout Tools
 - Simple Event-Scripts
-
- Direkt Gameplay testen
 - Schnelle Iterationen

Level Design Prinzipien

- Lernen der Spielmechaniken in sicherer Umgebung
 - Lineare Steigerung der Herausforderungen
 - Wiederholungen (z.B. 3-mal hintereinander Doppelsprung üben)
 - Abwechslung von Movement Mechanics (z.B. Rennen -> Springen -> Klettern)
 - Abwechslung im Gameplay (Exploration -> Traversal -> Combat)
- Kontraste!

Aufgabe: Simples 2D Jump 'n' Run Level

- 1-2 Minuten Gameplay
- Einfacher Einstieg, graduell schwieriger
- Wiederholungen & Skill Gates
- Kontraste
